AAKANKSHA GHARE

B.Tech Computer Science & IT (Cybersecurity)

Pune, Maharashtra | 7058757080|aakankshaghare0212@gmail.com Linkedin | GitHub

PROFESSIONAL SUMMARY

Computer Science and IT undergraduate specializing in Cybersecurity, with hands-on experience in Python application development, backend development, REST APIs, database integration, and automated software testing. Familiar with Linux environments, AWS cloud infrastructure, Docker, Kubernetes, and Git/GitHub, with an interest in DevOps, cloud computing, infrastructure automation, and reliable software delivery. Strong foundation in C, C++, Python, Data Structures and Algorithms, OOP, Operating Systems, DBMS, and Computer Networks. Experienced in building modular applications, troubleshooting technical issues, and validating software components.

TECHNICAL SKILLS

- **Languages:** Python, C++, C, JavaScript, SQL
- **DevOps & Cloud:** AWS, Azure, Docker, Kubernetes, Linux, Cloud Computing, CI/CD Fundamentals
- **Development & Testing:** Flask, REST APIs, JSON, Git, GitHub, Pytest, Debugging, Software Testing, VS Code
- **Databases:** MySQL, SQLite, PostgreSQL, Firebase Realtime Database, Database Design
- **Computer Science Fundamentals:** Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks
- **AI/ML and automation:** LangChain, OpenAI, Streamlit, TensorFlow, Keras, OpenCV, NumPy, Machine Learning, Retrieval Augmented Generation (RAG)
- **Cybersecurity:** TCP/IP, DNS, Networking, GDPR, ISO/IEC 27001, NIST CSF, DPDP, MITRE ATT&CK, OWASP Top 10, Nmap, Nessus, Splunk, Wireshark, Windows Security, Cryptography, Kali Linux, Security Governance and Compliance, Investigations, Vulnerability Management, Threat Management, Logging and Monitoring
- **Soft Skills:** Analytical Problem-Solving, Troubleshooting, Team Collaboration

CERTIFICATIONS & TRAININGS

- Containers & Orchestration - Docker + Kubernetes – OneRoadmap | Oct 2026
- Endpoint Security – Cisco Networking Academy | Sep 2026
- Python Essentials – Cisco Networking Academy | Mar 2025
- 30 Days Daily Programming Challenge – Wisdom Sprouts | Aug 2025

PROJECTS

1. **WinHunt – Windows Threat Hunting & Endpoint Telemetry Analysis Platform (Academic)**
   Python, Flask, SQLite, Pytest, Windows Event Logs
   - Developed a modular Python application to parse, normalize, analyze, and correlate Windows event data to identify suspicious activity.
   - Implemented modular detection rules, behavioral analysis, risk scoring, event correlation, and MITRE ATT&CK mapping.
   - Integrated Flask and SQLite for application functionality and event data management; used Pytest for automated testing and Git for version control to validate core parsing and detection components.
2. **NetSecureAI – Network Configuration Auditing & Compliance Platform (Self)**
   Python, Flask, REST APIs, SQLite, Pytest, Git
   - Developed a Python application to parse network configurations and evaluate security settings against compliance rules.
   - Implementing risk-based findings, compliance mapping, and remediation recommendations.
   - Built REST APIs functionality, automated tests, and audit reports to support security assessments and governance.
3. **RAG Enterprise Assistant (Self)**
   Python, LangChain, OpenAI LLMs, Streamlit, FAISS
   - Developed a Retrieval-Augmented Generation (RAG) application using Python, LangChain, and OpenAI API integration to retrieve relevant enterprise documentation and generate context-aware responses with source citations.
   - Implemented document ingestion, vector embeddings, similarity search, and prompt engineering to improve response relevance and LLM generated responses.
4. **PaySwift – Online Payment Application (Academic)**
   Kotlin, Android Studios, Firebase
   - Developed an Android payment application integrating Firebase Authentication and Realtime Database for user and transaction management.
   - Implemented database structures, security rules, and validation logic to support reliable and consistent transaction processing.

EXPERIENCE

1. **Cyber Crime Helpline LLP, Pune | Cyber Security Intern** (*Jun 2026 – Jul 2026)*
   - Contributed Python backend functionality to a steganography detection tool supporting image and Office document analysis.
   - Used 3+ Windows system-analysis tools like ProcMon, Process Explorer to investigate system activity, troubleshoot issues, and analyze processes.
   - Used Autopsy, FTK Imager, and Recuva in evidence acquisition and analysis workflows.
2. **Kalangan Art Café, Pune | Web Development Intern** (*Jun 2025 – Jul 2025)*
   - Developed responsive web interfaces using HTML, CSS, and JavaScript, translating UI designs into functional pages.
3. **CodeVertex | Web Development Intern** (*Dec 2024 – Jan 2025*)
   - Learned React.js fundamentals and worked on web development tasks using Visual Studio Code.
   - Gained practical exposure to Git and GitHub for version control, tracking code changes, and managing project repositories.
4. **YHills Edutech | AI/ML Intern** (*Jun 2024 – Jul 2024)*
   - Built and evaluated CNN-based machine-learning models using Python, TensorFlow, and Keras.

EDUCATION

B.Tech – Computer Science & Information Technology (Cybersecurity) | 2023–2027 | CGPA: 8.76/10
Symbiosis Skills and Professional University, Kiwale, Pune
